Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

#### 1. Reporting entity:

The principal business of Ballard Power Systems Inc. (the "Corporation") is the design, development, manufacture, sale and service of fuel cell products for a variety of applications, focusing on "commercial stage" markets of Telecom Backup Power and Material Handling, and on "development stage" markets of Bus and Distributed Generation, as well as the delivery of Technology Solutions including engineering services and the license and sale of the Corporation's extensive intellectual property portfolio and fundamental knowledge for a variety of fuel cell applications. A fuel cell is an environmentally clean electrochemical device that combines hydrogen fuel with oxygen (from the air) to produce electricity. The Corporation's technology is based on proton exchange membrane ("PEM") fuel cells.

The Corporation is a company domiciled in Canada and its registered office is located at 9000 Glenlyon Parkway, Burnaby, British Columbia, Canada, V5J 5J8. The condensed consolidated interim financial statements of the Corporation as at and for the three months ended March 31, 2015 comprises the Corporation and its subsidiaries.

### 2. Basis of preparation:

#### (a) Statement of compliance:

These condensed consolidated interim financial statements of the Corporation have been prepared in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB"), on a basis consistent with those followed in the most recent annual consolidated financial statements. The condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

The condensed consolidated interim financial statements were authorized for issue by the Audit Committee of the Board of Directors on April 28, 2015.

### (b) Basis of measurement:

The condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

- Financial instruments classified as fair value through profit or loss and available-for-sale are measured at fair value;
- Derivative financial instruments are measured at fair value; and
- Employee future benefits liability is recognized as the net total of the present value of the defined benefit obligation, less the fair value of plan assets.

Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 2. Basis of preparation (cont'd):

# (c) Functional and presentation currency:

These condensed consolidated interim financial statements are presented in U.S. dollars, which is the Corporation's functional currency.

# (d) Use of estimates:

The preparation of the condensed consolidated interim financial statements in conformity with International Financial Reporting Standards ("IFRS") requires the Corporation's management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Significant areas having estimation uncertainty include revenue recognition, asset impairment, warranty provision, inventory provision, employee future benefits, and income taxes. These estimates and judgments are discussed further in note 3.

# (e) Future operations:

The Corporation is required to assess its ability to continue as a going concern or whether substantial doubt exists as to the Corporation's ability to continue as a going concern into the foreseeable future. The Corporation has forecast its cash flows for the foreseeable future and despite the ongoing volatility and uncertainties inherent in the business, the Corporation believes it has adequate liquidity in cash and working capital to finance its operations. The Corporation's ability to continue as a going concern and realize its assets and discharge its liabilities and commitments in the normal course of business is dependent upon the Corporation having adequate liquidity and achieving profitable operations that are sustainable. There are various risks and uncertainties affecting the Corporation including, but not limited to, the market acceptance and rate of commercialization of the Corporation's products, the ability of the Corporation to successfully execute its business plan, and general global economic conditions, certain of which are beyond the Corporation's control.

The Corporation's strategy to mitigate these risks and uncertainties is to execute a business plan aimed at continued focus on revenue growth, improving overall gross margins, and managing operating expenses and working capital requirements. Failure to implement this plan could have a material adverse effect on the Corporation's financial condition and or results of operations.

Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 3. Critical judgments in applying accounting policies and key sources of estimation uncertainty:

Critical judgments in applying accounting policies:

Critical judgments that management has made in the process of applying the Corporation's accounting policies and that have the most significant effect on the amounts recognized in the consolidated financial statements are limited to management's assessment of the Corporation's ability to continue as a going concern (note 2(e)).

The Corporation's significant accounting policies are detailed in note 4 of the Corporation's consolidated financial statements for the year ended December 31, 2014.

Key sources of estimation uncertainty:

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have significant risk of resulting in a material adjustment to the reported amount of assets, liabilities, income and expenses within the next fiscal year.

#### (a) Revenue recognition:

Revenue under certain contracts for product sales and services, the license and sale of intellectual property, and the provision of engineering services provide for receipt of payment based on achieving defined milestones or on the performance of work under product development programs. Revenues are recognized under these contracts based on management's estimate of progress achieved against these milestones or on the proportionate performance method of accounting, as appropriate. Changes in management's estimated costs to complete a contract may result in an adjustment to previously recognized revenues.

# (b) Asset impairment:

The carrying amounts of the Corporation's non-financial assets, other than inventories, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The Corporation's most significant estimates and assumptions involve values associated with goodwill and intangible assets. These estimates and assumptions include those with respect to future cash inflows and outflows, discount rates, asset lives, and the determination of cash generating units. At least annually, the carrying value of goodwill is reviewed for impairment. Among other things, this review considers the fair value of the cash-generating units based on discounted estimated future cash flows. Intangible assets are also evaluated at least annually for indicators of potential impairment. Reviews involve significant estimation uncertainty, which could affect the Corporation's future results if the current estimates of future performance and fair values change.

Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 3. Critical judgments in applying accounting policies and key sources of estimation uncertainty (cont'd):

# (c) Warranty provision:

In establishing the warranty provision, management estimates the likelihood that products sold will experience warranty claims and the cost to resolve claims received. In making such determinations, the Corporation uses estimates based on the nature of the contract and past and projected experience with the products. Should these estimates prove to be incorrect, the Corporation may incur costs different from those provided for in the warranty provision. Management reviews warranty assumptions and makes adjustments to the provision at each reporting date based on the latest information available, including the expiry of contractual obligations. Adjustments to the warranty provision are recorded in cost of product and service revenues.

# (d) Inventory provision:

In determining the lower of cost and net realizable value of inventory and in establishing the appropriate impairment amount for inventory obsolescence, management estimates the likelihood that inventory carrying values will be affected by changes in market pricing or demand for the products and by changes in technology or design which could make inventory on hand obsolete or recoverable at less than the recorded value. Management performs regular reviews to assess the impact of changes in technology and design, sales trends and other changes on the carrying value of inventory. Where it is determined that such changes have occurred and will have an impact on the value of inventory on hand, appropriate adjustments are made. If there is a subsequent increase in the value of inventory on hand, reversals of previous write-downs to net realizable value are made. Unforeseen changes in these factors could result in additional inventory provisions, or reversals of previous provisions, being required.

# (e) Impairment loss (recoveries) on trade receivables:

Trade and other receivables are recognized initially at fair value and subsequently at amortized cost using the effective interest method, less any impairment losses. Fair value is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. In determining the fair value of trade and other receivables and establishing the appropriate provision for doubtful accounts, management performs regular reviews to estimate the likelihood that trade and other receivables will ultimately be collected in a timely manner. Where management determines that customer collectability issues have occurred and will have a negative impact on the value of trade and other receivables, appropriate provisions are made. If there is a subsequent recovery in the value of trade and other receivables, reversals of previous write-downs to fair value are made. Unforeseen changes in these factors could result in additional impairment provisions, or reversals of previous impairment provisions, being required.

Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 3. Critical judgments in applying accounting policies and key sources of estimation uncertainty (cont'd):

### (f) Employee future benefits:

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that have terms to maturity approximating the terms of the related pension liability.

Determination of benefit expense requires assumptions such as the discount rate to measure obligations, expected plan investment performance, expected healthcare cost trend rate, and retirement ages of employees. Actual results will differ from the recorded amounts based on these estimates and assumptions.

### (q) Income taxes:

Deferred tax assets and liabilities are measured using enacted, or substantively enacted, tax rates expected to apply to taxable income in the years in which temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is included in income in the period that includes the substantive enactment date. Management reviews the deferred income tax assets at each reporting period and records adjustments to the extent that it is no longer probable that the related tax benefit will be realized.

# 4. Discontinued operations - Disposition of Material Products division:

On January 31, 2013, the Corporation completed an agreement to sell substantially all of the assets of its Material Products division for net cash proceeds of \$9,085,000 after deducting for working capital adjustments, broker's commissions and expenses, and legal and other expenses. In March 2014, the Corporation received additional proceeds of \$320,000 payable through a product credit in 2014 and 2015 for fuel cell gas diffusion layers based on 2013 results of the former Material Products division. The additional proceeds payable were recorded as a reversal of previously recorded impairment losses on property, plant and equipment, and were recorded in net profit from discontinued operations in 2014. As of March 31, 2015, the additional proceeds have been fully paid through the product credit. The Material Products division has been classified and accounted for as a discontinued operation.

#### 5. Inventories:

During the three months ended March 31, 2015, the write-down of inventories to net realizable value amounted to \$232,000 (2014 - \$5,000). There were no reversals of previously recorded write-downs during the three months ended March 31, 2015 and 2014. Write-downs and reversals are included in either cost of product and service revenues, or research and product development expense, depending on the nature of inventory.

Intellectual property acquired from H2 Logic A/S		366
At March 31, 2015	\$	4,713

On April 24, 2014, the Corporation acquired the transportation and stationary related fuel cell intellectual property assets (the "UTC Portfolio") of United Technologies Corporation ("UTC") for total consideration of \$22,306,775. The acquired assets consist of approximately 800 patents and patent applications, as well as patent licenses, invention disclosures and know-how primarily related to PEM fuel cell technology. As consideration for the UTC Portfolio, UTC received 5,121,507 of the Corporation's common shares valued at \$20,306,775, \$2,000,000 in cash, a grant back license to use the patent portfolio in UTC's existing businesses, and a portion of royalties, typically 25%, on the Corporation's future intellectual property sale or licensing income generated from the combined intellectual property portfolio for a period of 15 years to April 2029. The UTC Portfolio was being amortized over its estimated useful life of 15 years as of April 2014.

On February 11, 2015, the Corporation entered into a transaction ("Volkswagen IP Agreement") with Volkswagen Group ("Volkswagen") to transfer to Volkswagen in two separate transactions the automotive-related portion of the UTC Portfolio, in exchange for total payments of \$50,000,000:

- (i) On the closing of the initial transaction on February 23, 2015, the Corporation transferred ownership of the automotive-related patents and patent applications of the UTC Portfolio in exchange for \$40,000,000. This receipt triggered a 25%, or \$10,000,000, license fee payment to UTC. Although ownership of the patents and patent applications was transferred to Volkswagen, the Corporation received a royalty-free back-license to all the transferred patents and patent applications to utilize in all of the Corporation's non-automotive applications, in bus applications, and in certain limited pre-commercial purposes for automotive applications.
- (ii) On or before February 16, 2016, the Corporation will transfer a copy of the automotive-related know-how of the UTC Portfolio in exchange for \$10,000,000. This receipt will trigger a 9%, or \$900,000, payment to UTC. On the closing of the transfer of the know-how, the Corporation will retain the right to use the know-how in all of the Corporation's applications.

Notes to Condensed Consolidated Interim Financial Statements Three months ended March 31, 2015 and 2014 Unaudited (Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 6. Intangible assets (cont'd):

In connection with the transaction, Volkswagen extended the existing 4-year technology development and engineering services agreement signed by the Corporation and Volkswagen in 2013 for two additional years to February 2019. Volkswagen also retains an option to extend this agreement for a further two-year term to February 2021. This technology development and engineering services contract contemplates the design and manufacture of next-generation fuel cell stacks for use in Volkswagen's fuel cell demonstration car program.

On the closing of the sale of the automotive-related patents and patent applications of the UTC Portfolio during the three months ended March 31, 2015, the Corporation recognized a gain on sale of intellectual property of \$14,195,000 on net proceeds of \$29,475,000.

Gross proceeds	\$ 40,000
Less: License fee	(10,000)
Disposition costs	(525)
Net proceeds	29,475
Less: Net book value of disposed intellectual property	(15,280)
Gain on sale of intellectual property	\$ 14,195

The \$10,000,000 in additional proceeds relating to the transfer of the automotive-related know-how of the UTC Portfolio will be recorded on the closing of the transfer on or before February 16, 2016. Intellectual property assets of \$3,820,000 relating to the cost of the automotive-related know-how of the UTC Portfolio have been reclassified from intangible assets to assets held for sale as of March 31, 2015.

The net carrying amount of the remaining intangible assets of the UTC Portfolio of \$3,000,000 consist of certain stationary related fuel cell intellectual property assets and the royalty-free back-license from Volkswagen to utilize the entire UTC Portfolio in the Corporation's bus and non-automotive applications and in certain limited pre-commercial purposes for automotive applications. The estimated useful life of the remaining UTC Portfolio has been reassessed from approximately 14 years to 7 years, and will be amortized over 7 years from the date of the Volkswagen IP Agreement.

Amortization and impairment losses of fuel cell technology and development costs are allocated to research and product development expense. For the three months ended March 31, 2015, amortization of \$425,000 (2014 - \$307,000) was recorded. There were no impairment losses recorded during the three months ended March 31, 2015 and 2014.

Non-current decommissioning liabilities	\$ 4,015	\$	4,353

#### 9. Finance lease liability:

The Corporation has a CDN \$1,830,770 capital leasing facility ("Leasing Facility") which can be utilized to finance the acquisition and lease of operating equipment. Interest is charged on outstanding amounts at the bank's prime rate per annum and is repayable on demand by the bank in the event of certain conditions. The Corporation leases certain assets under finance lease agreements, which have imputed interest rates ranging from 3.00% to 7.35% per annum and expire between June 2016 and February 2025. At March 31, 2015, \$870,000 (December 31, 2014 – \$1,061,000) was outstanding on the Leasing Facility which is included in the finance lease liability. The remaining \$8,278,000 (December 31, 2014 - \$9,173,000) finance lease liability relates to the lease of the Corporation's head office building.

Deferred gains were also recorded on closing of the finance lease agreements and are amortized over the finance lease term. At March 31, 2015, the outstanding deferred gain was \$4,164,000 (December 31, 2014 - \$4,274,000).

# 10. Equity:

# (a) Share capital:

On April 24, 2014, the Corporation issued 5,121,507 of its common shares valued at \$20,306,775 to UTC as part of the consideration for acquired intellectual property assets (note 6).

At March 31, 2015, 132,566,428 common shares were issued and outstanding.

At March 31, 2015	122,563	1,675,000	1,797,563

At March 31, 2015, 1,797,563 share purchase warrants were issued and outstanding.

#### (c) Convertible promissory note:

On March 28, 2013, the Corporation completed an agreement with Anglo American Platinum Limited ("Anglo"), under which Anglo invested \$4,000,000 in the Corporation through its Platinum Group Metals Development Fund, to support continued development and commercial advancement of the Corporation's fuel cell products in target market applications. The investment took the form of a 5 year non-interest bearing convertible promissory note ("Note"). The Note may be repaid in the form of the Corporation's common shares at Anglo's option on or before the loan maturity date of April 1, 2018. The conversion, or repayment price, was set at a fixed price of \$0.84 per share which was equal to a 20% discount to the market price of the shares on the closing date of the agreement.

In March 2014, Anglo exercised its option and converted the Note into 4,761,905 common shares. The conversion right and \$4,000,000 proceeds received in 2013 were accounted for as a single equity instrument and originally recorded in contributed surplus, which has been reclassified to share capital upon the issuance of the common shares in March 2014.

#### (d) Share options:

During the three months ended March 31, 2015, 221,057 (2014 - 3,214,544) options were exercised for proceeds of \$281,000 (2014 - \$6,152,000).

During the three months ended March 31, 2015, options to purchase 1,931,135 (2014 -1,367,507) common shares were granted with a weighted average fair value of \$1.33 (2014 -\$1.73). The granted options vest annually over three years.

Notes to Condensed Consolidated Interim Financial Statements

(Tabular amounts expressed in thousands of U.S. dollars, except number of shares)

# 10. Equity (cont'd):

# (d) Share options (cont'd):

The fair values of the options granted during the period were determined using the Black-Scholes valuation model under the following weighted average assumptions:

	Three months	Three months ended March 31,		
	2015	2014		
Expected life	4 years	4 years		
Expected dividends	Nil	Nil		
Expected volatility	77%	68%		
Risk-free interest rate	1%	1%		

As at March 31, 2015 and 2014, options to purchase 5,699,266 and 4,762,901 common shares, respectively, were outstanding. During the three months ended March 31, 2015, compensation expense of \$450,000 (2014 - \$273,000) was recorded in net income based on the grant date fair value of the awards recognized over the vesting period.

# (e) Deferred share units:

As at March 31, 2015 and 2014, 789,756 and 833,096 deferred share units ("DSUs"), respectively, were outstanding. During the three months ended March 31, 2015 and 2014, 32,193 and 216,832 DSUs were issued, respectively.

During the three months ended March 31, 2015, \$193,000 of compensation expense was recorded in net income, of which \$67,000 related to DSUs granted during the quarter. The remaining \$126,000 related to compensation expense expected to be earned for DSUs not yet issued.

During the three months ended March 31, 2014, \$77,000 of compensation was recorded in net income relating to 17,522 DSUs granted during the period. For the remaining 199,310 DSUs granted during the period, estimated compensation expense of \$737,000 was recorded in net income in 2013. Upon the issuance of the DSUs in 2014, an \$18,000 adjustment increasing net income was recorded.

# (f) Restricted share units:

As at March 31, 2015 and 2014, 1,758,899 and 1,980,214 restricted share units ("RSUs"), respectively, were outstanding. During the three months ended March 31, 2015, 841,295 (2014 – 544,894) RSUs were issued and compensation expense of \$117,000 (2014 – \$428,000) was recorded in net income. Each RSU is convertible into one common share. The RSUs vest after a specific number of years from date of issuance and, under certain circumstances, are contingent on achieving specific performance criteria.

In March 2014, the Corporation sold its remaining 65,441 treasury shares for proceeds of \$365,000 as no RSUs remained outstanding under the market purchase RSU plan. As of March 31, 2015, the Corporation held no treasury shares.

	Three	Three months ended March 31, 2015 2014		
Non-cash financing and investing activities:				
Compensatory shares	\$	415	\$	835

# 15. Operating segments:

The Corporation operates in a single operating segment, Fuel Cell Products and Services, which consists of the sale and service of fuel cell products for "commercial stage" markets of Telecom Backup Power and Material Handling, and for "development stage" markets of Bus and Distributed Generation, as well as the delivery of Technology Solutions including engineering services and the license and sale of the Corporation's extensive intellectual property portfolio and fundamental knowledge for a variety of fuel cell applications.

#### 16. Financial instruments:

#### (a) Fair value:

The Corporation's financial instruments consist of cash and cash equivalents, short-term investments, trade and other receivables, investments, trade and other payables, and finance lease liability. The fair values of cash and cash equivalents, trade and other receivables, and trade and other payables approximate their carrying value because of the short-term nature of these instruments. The interest rates applied to the finance lease liability are not considered to be materially different from market rates, thus the carrying value of the finance lease liability approximates fair value.

Fair value measurements recognized in the statement of financial position must be categorized in accordance with the following levels:

- (i) Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (ii) Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- (iii) Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

#### (b) Investments:

The Corporation had a 15% ownership share in Chrysalix Energy Limited Partnership ("Chrysalix"), which was accounted for as an available-for-sale financial asset and was recorded at fair value. In March 2014, the Corporation recorded an impairment loss of \$150,000 when it wrote-off the remaining \$150,000 value of Chrysalix to its estimated net realizable value of nil. On June 30, 2014, the operations of Chrysalix were formally terminated and the company was dissolved.
